

ALUMNO:

Alexis Yahir Alvarez León

MATERIA:
Sistemas Operativos

Actividad gpg practica

“ICO”

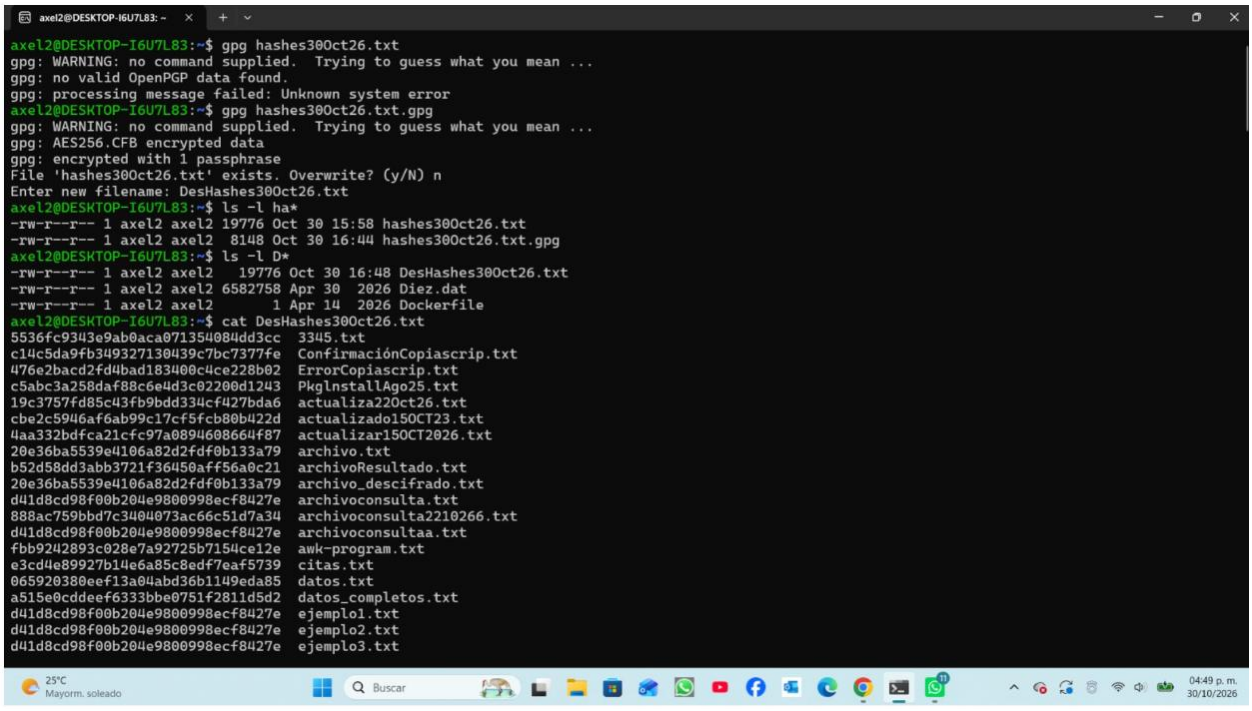

“COMPARTE LA FELICIDAD”

30/10/2026

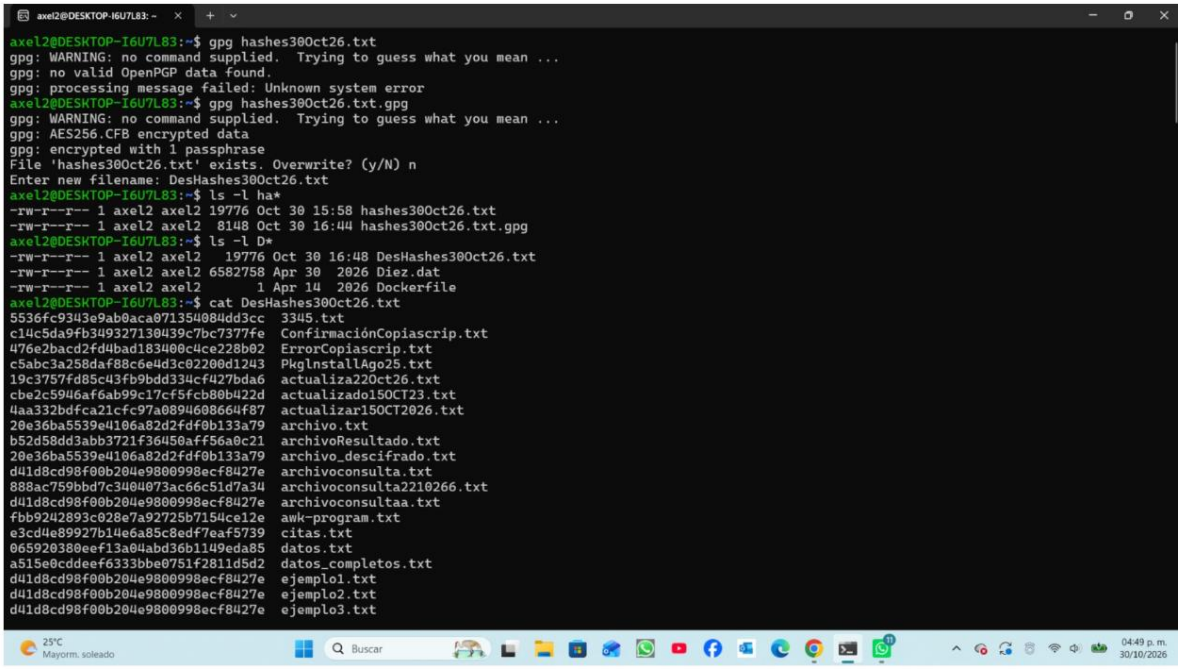

Este día 30/10/2026 trabajamos en clase el tema de Cifrado Simétrico y Asimétrico

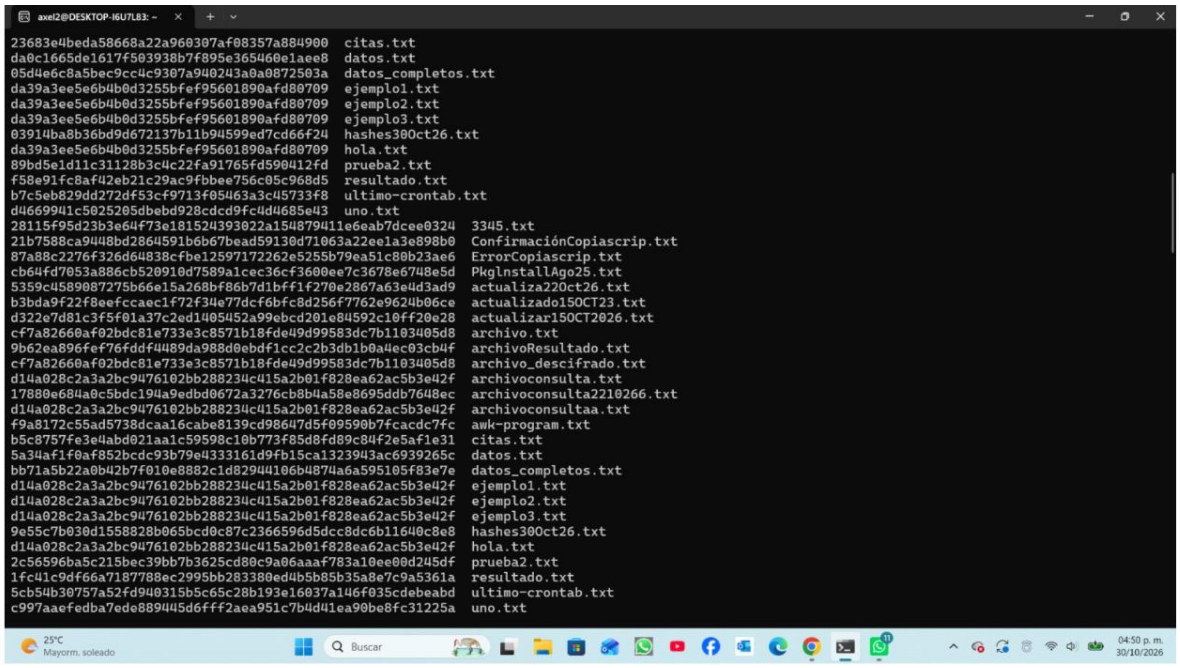

Y todo comenzó gracias a este tema **Cifrado con GnuPG desde Terminal en GNU/Linux de este link** https://colectivodisonancia.net/herramientas/cifrado-gpg-terminal/

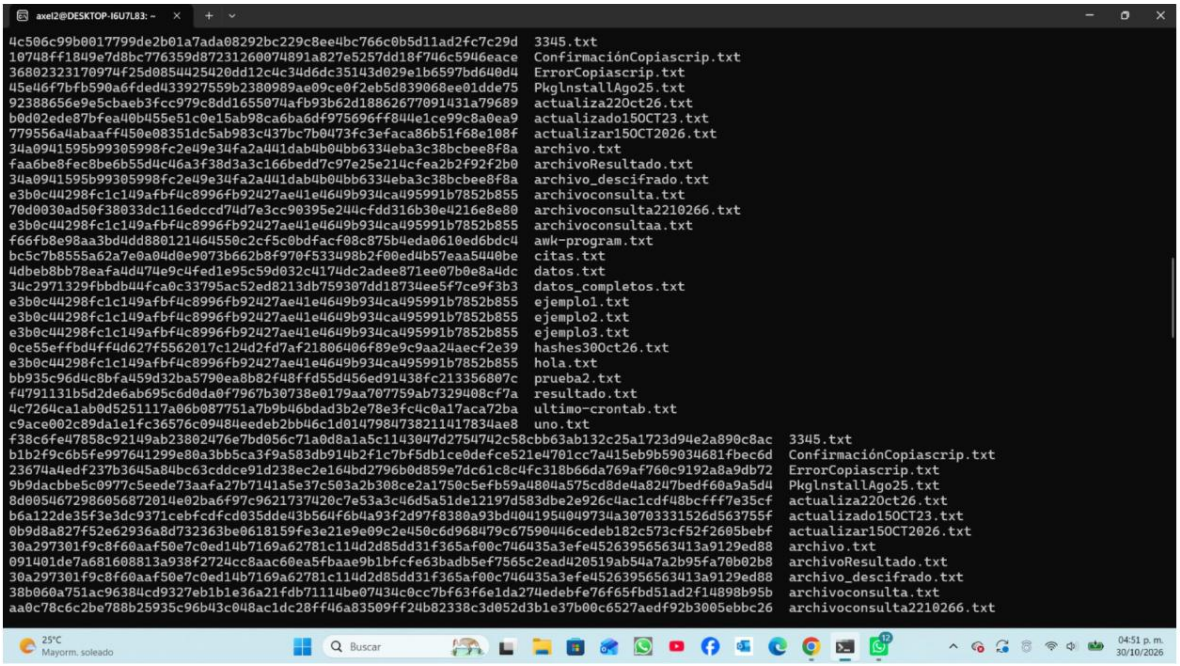

Asi que vamos a explicar lo que pide la profesora
Primero se pone el comando gpg hashes30Oct26.txt para ponerle poderlo cifrar pero como ya tenemos ese pusimos de nuevo ese comando pero con hashes30Oct26.txt.gpg para cifrar y le damos en n y ahora si se crea un nuevo nombre y se pone DesHashes30Oct26.txt Des de descifrar

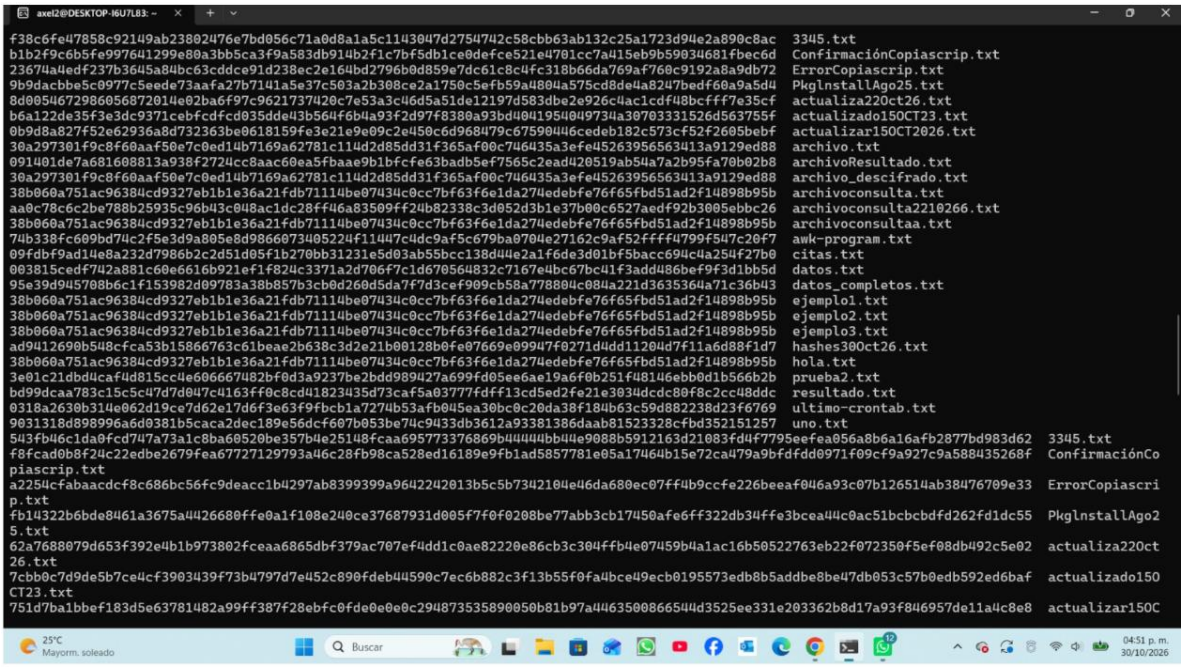

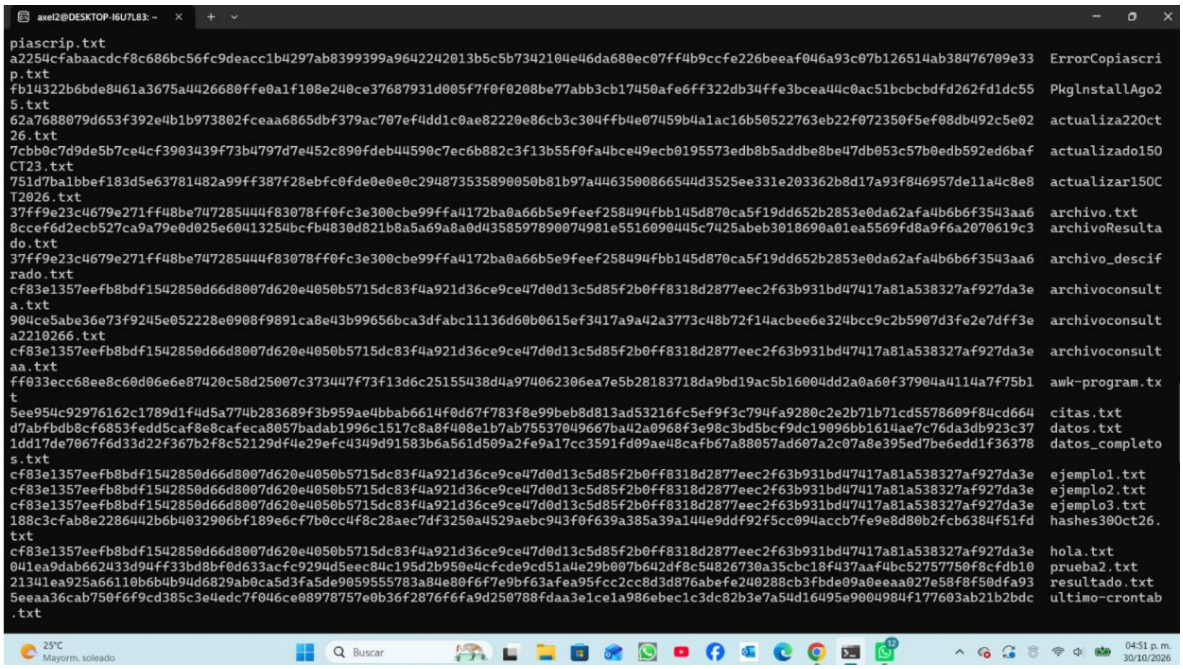

Luego verificamos que si se haya creado y le damos lectura con cat DesHashes30Oct26.txt y vemos que funciono se ve todo descifrado con todos los txt en sha1sum sha256sum y otros mas
